## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-32 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for controlling access to encrypted broadcast services. Each independent claim recites the uniquely distinct features of "receiving preliminary preview key information prior to receiving a broadcast subscription key for the requested broadcast services transmission; and decrypting the encrypted broadcast services transmission using the preliminary preview key information prior to receiving the broadcast subscription key". The closest prior arts, Hawkes et al. (US 20030039361); Akiyama (US 20020001386); and Guillou (US 4,323,921), each fail to anticipate or render the underlined limitations obvious. Hawkes et al. (US 20030039361) disclose a broadcast service using a broadcast key to decrypt the entire encrypted broadcast service. Akiyama (US 20020001386) discloses a conditional access system using work keys, a master key and a channel key for accessing transmitted digital data. Guillou (US 4,323,921) discloses a system for delivering digital data to subscribers. None of the arts show the use of a preview key to decrypt the encrypted broadcast services.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
